Principal Planner Dennis Carrington presented the amendment to the Water Quality and Conservation sections of the Municipal Code, regarding NPDES. On September 28, the Planning Commission voted to recommend that the City Council adopt these changes. Principal Engineer Darryl Wong was available to answer questions.

The City of Milpitas along with twelve other cities are co-permittees in the NPDES permit, for specified federal purposes for clean water. Staff explained C-3 requirements needed in the amendment. The Regional Water Quality Control Board checks in with the City each year on NPDES requirements.

Mayor Esteves asked how often the plan was updated. Mr. Carrington responded, the NPDES Permit was reviewed every year, while the City's General Plan was reviewed over a ten-year period.

Mayor Esteves opened the public hearing for testimony and none was heard.

RA 5. Review, Consider and Provide Staff Direction on Funding Concept for Landscaping and Maintenance of 237/I880 Interchange

City Engineer Greg Armendariz provided a detailed overview of the need for direction from the Agency on how to proceed with funding for landscaping and maintenance at the two significant roadway interchanges. He reviewed financial concerns, as detailed in the staff report to Council.

The landscape concept plan was already developed, with maintenance costs estimated at \$100,000 per year. If the city initiated a maintenance plan, then it would start with the landscaping portion in 2010. Partial funding for underneath the light rail median, at the Great Mall Parkway, from the Valley Transportation Authority would be assigned to the light rail transit project area to cover maintenance costs for the landscaping.

Councilmember Livengood asked: was the maintenance issue going to change? The City Engineer clarified that it was a \$2 million commitment, no matter what (regardless of timing). Mr. Livengood further inquired who was responsible for the VTA area landscaping, and the response was the City since it was City property. Maintenance would

be performed either of two ways: Caltrans contracted labor or City staff. Council member Livengood felt that income from new homes to be built would be appropriated toward future labor and maintenance costs.

Mayor Esteves asked how much City money must go into the maintenance costs for the freeway interchange. Staff replied the City would maintain it over a long period of time.

MTA representative John Bristow was available to answer questions. Mr. Bristow mentioned issues of Caltrans level of maintenance, all over the City. \$1.8 million was committed for landscaping due in 2010 (until then no landscaping would be done).

Councilmember Giordano expressed her comments that the project is terrific. She felt that the new Community Facilities District impacts would be felt all over the City.

Staff expressed that direction was sought to move forward to get draft agreements, and commitments from all sides (though not set in stone). Or, Council could direct staff not to move forward at all. The City Engineer said it was a matter of leveraging money the City has now, from the MTA.

Councilmember Polanski inquired, in 2010, how does the City know the money would be available? Mr. Armendariz would draft the agreement in such a way with MTA that STIP funds must be received first, before any work would proceed.

Councilmember Livengood reiterated that some agreements already were made which the City must live up to, in partnership with Caltrans and MTA. Otherwise, the City would have to return money back to these funders if no progress was made. His opinion of the prospect of 880 just growing weeds over the next ten years was unpalatable. He said it would be wise to follow (2nd column on the screen display) "Optional Funding" to move the landscaping and maintenance projects forward, with the strong hope that STIP money comes due in 2010.

Mayor Esteves inquired about \$2 million from Caltrans, for the agreement needed between the City and Caltrans directly. The City Engineer said it would come as one lump sum. Currently, very basic weeding of mulch occurred. That was only what would continue, if the STIP funds were not received.

Motion: Move the City Council and Redevelopment Agency adopt the Optional Funding plan, as described by the City Engineer

Motion/Second: Agency/Councilmember Livengood /Agency/Councilmember Giordano

Motion carried by a vote of:

AYES: 4
NOES: 0
ABSENT: 1 (Gomez)

8. Approval of the Proposed Terra Serena (KB Homes) Public Park Equipment, Fixtures and Furnishings for Alvarez and Elm Parks

Assistant Planner Staci Pereira described and displayed photos of the park equipment for the new KB Homes development, where there were 683 units on 35 acres on S. Abel St., at Terra Serena. There was seven acres of new public park area.

Public park equipment, fixtures and furnishing for the parks already had been before the City's Parks, Recreation and Cultural Resources Commission. The PRCRC gave specific feedback on the proposed equipment. There are three parks described in the new neighborhood (including one in condominium project area). At this meeting, the City Council would vote on proposals for two of the parks: Alvarez Court Park and Elm Park.

One condition was added to Concept D for the park equipment, because the City's elm trees were diseased, and some rotted, so the use of the wood for outdoor benches and tables was questionable. It was recommended that the applicant work to display a portion of the original Elm trees if the wood was not feasible for tables and benches.

Councilmember Polanski was very pleased with the fixtures, details and plans displayed. She and other Councilmembers expressed surprise at how decayed the Elm trees were, and hoped some wood could be saved.

Councilmember Livengood inquired about the impacts of material that would go on the ground (recycled rubber surfacing) and asked how far out would the material go. Ms. Pereira responded that it would be located in the play area, at the play structures.

Councilmember Giordano requested a change in recommendation number 3, in the event benches/tables cannot be made from the Elm trees, that that issue then must return to the PRCRC. The Commission could then make a recommendation to the Council about the display of a portion of the original Elms.

Mayor Esteves inquired about the "pre-fab" restrooms proposed and whether it was standard to install those in Milpitas. Staff responded it was not; however, the applicant requested those due to their durability. Recreation staff had reviewed the plan and was satisfied. Also, the exteriors of the restroom building at the park would compliment the remainder of the buildings in the housing development.

Motion: move to authorize the developer-proposed and PRCRC-approved park equipment with the following three conditions:

- 1) Pre-fabricated restrooms shall use the same concrete tiles and be painted to compliment the approved residential buildings.
- 2) Applicant shall provide the Public Works Department (Park Maintenance) with 10 additional roof tiles ("Lifetile" Concrete "S" tile, Class B) for future repairs.

- 3) Implement all of the elements of Concept D. If Elm benches and tables are determined not to be possible, to display a section or piece of the original Elms in some manner.

Councilmember Giordano's motion included that in Item 3, that the Parks Recreation and Cultural Resources Commission review such display and make their recommendation to the City Council.

Motion/Second: Councilmember Giordano / Councilmember Polanski

Motion carried a vote of:

AYES: 4

NOES: 0

ABSENT: 1 (Gomez)

ORDINANCE

Item adopted on the Consent Calendar.

RESOLUTION

13. Adopt Resolution for Emergency Water Supply and Approve Agreement for a Permanent Water Connection with Spring Valley Heights Assoc.

Principal Engineer Darryl Wong presented the request from Spring Valley Heights Association, due to its diminished well water. He explained that Spring Valley wanted an extension for emergency water supply since its most recent well had failed.

The current request was to extend water service until 12-31-07, and for the association to find a permanent water supply (potentially with the City of Milpitas). Mr. Wong stated that members of the Homeowners Association were present in the audience.

Councilmember Giordano inquired as to the original intention. Staff replied to drill for wells and four were drilled and each had failed. The ongoing problem for Spring Valley was that they were unable to provide water consistently.

Councilmember Livengood stated that Spring Valley Heights would pay for the construction and other costs of the water delivery to the neighborhood. He asked who does the work and by whose contractor? Construction would be done via a contract, with a provision that the company meet all City requirements and get permits for inspection, to assure compliance. Reimbursement costs would be paid through an account to recover personnel and other costs. Operation and maintenance would be paid by Spring Valley, as included in the agreement.

Councilmember Polanski asked if liens could be placed on accounts if individual water bills were not paid. Mr. Wong responded yes, just as occurred with current customers. She also had a question about the Minnis Reservoir, serving Summit Pointe and Spring Valley Heights. Mr. Wong said it cascades and its capacity is very large, plenty of water was available at the reservoir. Adding more demand to the tank was sufficient for use in the future.

Mayor Esteves asked if all construction was the responsibility of Spring Valley and where was the construction connection point? Staff explained that a pipeline runs to the highest reservoir point, across county property through Ed Levin Park, and then connected to Spring Valley. Water meters would be installed in water main lines and an agreement signed with the Homeowners Association.

Public Speakers

Greg McRoberts, a resident since 1976, described two disruptions of water at Summit Pointe. One was due to a house that burned down, maybe from lack of water. He regarded the Minnis tank as an emergency source, in case the power goes out. He was concerned if an earthquake comes and if a water line uphill severs, then they would have emergency water. If it goes over to Spring Valley and broke, then there would be no water. He said Summit Pointe had paid for this water supply.

Bob Scott, President of Spring Valley Homeowners Association, explained he had been before the Council many times in the past five years, about studies regarding water. He felt there was plenty of water capacity. Summit Pointe should have an emergency water supply tank already. Mitigating measures already were taken. He wanted to continue the approval process. Mr. Scott reminded the public that all information on this subject was public and available.

Tom Morse, Chief Financial Officer for Spring Valley Heights Association, which now had 19 homes, would have 26 at its maximum build-out. There was low usage in that neighborhood, with 1.7 million gallons (less than 250 gallons per day per home). The mitigated negative declaration was adopted and published, and he asked the Council to move forward on the agreement presented.

Larry Pennington, Tularcitos Drive, attended the Homeowners Association board meeting last week. He did not have time to review this plan yet. The emergency supply sounded reasonable. He had concerns for when an earthquake hit, and if a line breaks, and what would occur about the water supply in the hills.

Councilmember Livengood remembered that Spring Valley Heights and the City along with LAFCo had been going along with this matter for long time. It was time to be approved, so he supported the staff recommendation. He also suggested that staff should have a meeting with Summit Pointe residents to provide information and answer any questions that remain.

Mayor Esteves was surprised that Summit Pointe residents do not know about this subject as it had been a long time in coming, the homework was done patiently, it was about time to move forward on this topic, he said. He felt there was no major negative.

Councilmember Giordano stated that she would vote against the motion. She preferred the agreement to be delayed one to two more meetings, in order that Summit Pointe residents have more time to review the material.

Motion: move to adopt the following two actions:

(1) Approved Resolution No. 7557 for emergency water supply until December 31, 2007 or until a permanent water connection is constructed, and water is supplied under a water supply agreement.

(2) Approved water supply agreement with Spring Valley Heights Association, subject to approval as to form by the City Attorney.
